

# FormFactor's Commitment to Quality, Environment, Health and Safety

## QUALITY

- As an industry leading provider of electrical test and measurement technologies, FormFactor is committed to world-class quality and continuous improvement in everything we do.
- FormFactor's products and services are mission critical to our customers' success. We strive to consistently and predictably develop and deliver products that are defect-free and exceed customer expectations, both out of the box and over the life of the product.
- FormFactor maintains a Quality Management System (QMS) that both requires and enables our employees to continuously improve key operational, product, and administrative processes.
- Quality means producing defect-free work and is part of every employee's job in every organization throughout the company.

## EHS

- As an industry leading provider of electrical test and measurement technologies, FormFactor is committed to providing a safe working environment for our employees and being a responsible citizen in the communities and environments in which we operate.
- FormFactor complies with all applicable environmental, health and safety laws and regulations. We strive to develop and deliver products that meet or exceed expectations for environmental, health and safety requirements, by preventing pollution, responsibly consuming natural resources, minimizing waste, as well as identifying and controlling hazards that are a result of our business activities.
- FormFactor maintains an Environmental, Health and Safety (EHS) management system that both requires and enables employees to continuously improve environmental, health and safety practices and processes.

Mike Slessor  
Chief Executive Officer
